web app. Automatic detection can only detect a subset of issues and

does not guarantee the accessibility of your web app, so manual testing is also encouraged.

ARIA

ARIA input fields do not have accessible names

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.
